Local Projects (Aberdeen)

UNDERWAY – Farragut Street Pump Station

The station's existing sheet pile walls, bar screen, pump house, wet well, piping, and outlet structure have experienced significant differential settlement causing structural failure and some components of the station to no longer be in alignment.

An estimated 800 man-hours were spent in 2019 on regular maintenance, emergency maintenance to address clogged intakes that are chronic with the station's design, and providing a supplemental trailer-mounted pump during storms and during emergency maintenance events.

Flood Warning System (2022 Flood Event)

Flood Warning System Works!

The Flood Authority's flood warning system website was incredibly active during the January flood. Nearly 25,000 individual user logins were recorded and the flood inundation maps received almost 75,000 hits, providing vital information to the community during the flood emergency. *Dave Curtis, West Consultants, 2/01/2022*

Better information. Better decisions. Better government.

Today vs 2007

Today, we are substantially more aware, better prepared for catastrophic flooding than ever before.

- ✓ We have a state-of-the art flood warning system.
- ✓ We've completed many cost-efficient local projects and habitat projects.
- ✓ We're serving people, local governments, emergency responders, agriculture, fish and habitat.
- ✓ We have a governance, administrative, and funding structure that's delivering results.
