Chehalis Basin Strategy: Reducing Flood Damage and Enhancing Aquatic Species

Comparison of Alternatives

September 26, 2014

Analysis of Alternatives Timeline

Perspectives

| | State | Basin-Wide | Federal |
|--|-------------------------------|--|--------------------------|
| Geographic Area for Evaluating Impacts | State of WA | Lewis, Thurston, & Grays Harbor Counties | U.S. |
| Discount Rate | 1.63%, range 0%-7% | 1.63%, range 0%-7% | 3.5% |
| Agriculture Crops | Value at State Prices | Value at State Prices | Value at National Prices |
| I-5 Delays | All Traffic | Local + internal/external traffic | All traffic |
| Structure & Content Value | Depreciated or Replacement | Depreciated or Replacement | Depreciated |
| Business Interruption | None | Included | None |
| Input-Output Modeling | State Model | County Model | None |

Project Alternatives

- Flood Retention Only (FRO) Facility
- Multipurpose (MP) Facility
- I-5 WSDOT Project
- Small Projects (Flood Proofing)
- Aquatic Species Enhancement Programs

Project Alternatives

- 1. Flood Proofing Only
- 2. Low Enhancement Only
- 3. High Enhancement Only
- 4. I-5 Project plus Airport Levee, Flood Proofing, and Low Enhancement
- 5. I-5 Project plus Airport Levee, Flood Proofing, and High Enhancement
- 6. Flood Retention Only Storage plus Airport Levee, Flood Proofing, and Low Enhancement
- 7. Flood Retention Only Storage plus Airport Levee, Flood Proofing, and High Enhancement

Project Alternatives (cont'd)

- 8. Multipurpose Storage plus Airport Levee, Flood Proofing, and Low Enhancement
- 9. Multipurpose Storage plus Airport Levee, Flood Proofing, and High Enhancement
- 10. Flood Retention Only Storage, I-5 Project, Airport Levee, Flood Proofing, and Low Enhancement
- 11. Flood Retention Only Storage, I-5 Project, Airport Levee, Flood Proofing, and High Enhancement
- 12. Multipurpose Storage, I-5 Project, Airport Levee, Flood Proofing, and Low Enhancement
- 13. Multipurpose Storage, I-5 Project Airport Levee, Flood Proofing, and High Enhancement

Alternative Costs – Flood Proofing

EXPECTED CASE 100% RESIDENTIAL AND 25% ACHIEVABILITY FOR NON-RESIDENTIAL \$2014

| I-5 Project | \$100,000,000 | \$5,000 |
| Airport Levee | \$4,500,000 | \$8,000 |
| Flood Retention RCC with CHTR Fish Passage | \$280,250,000 | \$793,000 |
| Multipurpose RCC with CHTR Fish Passage | \$370,350,000 | \$1,539,000 |
| Multipurpose RCC with Conventional Fishway | \$405,350,000 | \$1,391,000 |
| Multipurpose Rockfill with Experimental Fishway | \$574,100,000 | \$1,624,000 |

Project Alternative Costs – State with High Restoration (100 Year NPV)

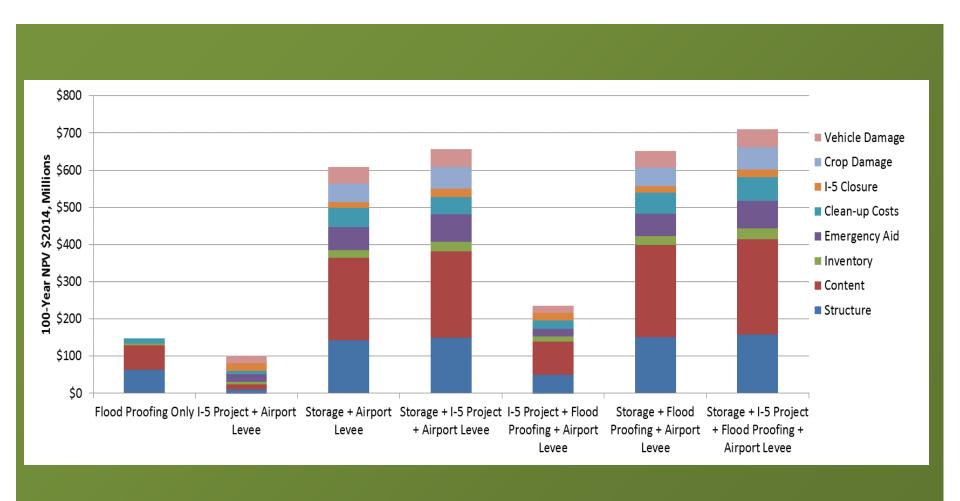

Project Alternative Costs – State with Low Restoration (100 Year NPV)

Impacts Evaluated

- Flood Damage to Structures, Content, and Inventory
- Clean-Up Costs for Buildings and Agricultural Acreage
- Vehicle Damages
- Loss of Agriculture Crops or Crop Damage
- Transportation Delays on I-5
- Temporary Relocation Costs for Evacuated Residents
- Public Assistance for Emergency Protective Measures for Bridges, Utilities,
 Water Control Facilities, or Debris Removal
- Business Interruption
- Tribal Fishing
- Commercial Fishing
- Sport Fishing
- Economic Development

Non-Environmental Impacts

Non-Environmental Benefits

Indirect Benefits

- Implan Model Used to Determine the Economic Impact of Avoiding Flooding Damage
- Five Impacts Modeled
 - Project expenditures
 - > Property damage reduction
 - > Business loss reduction
 - > Lost household income
 - Other project impacts (commercial & sports fishing)
- Overall Increase Net Benefits Significantly

Key Findings

- Flood Proofing Viable Solution to Damage Reduction for Residential Structure and Content, however, It Does Not Solve Issue of Flooded Roads, Commercial Buildings and Agricultural Lands
- Enhancement Programs are not Cost-Effective if Only Use Values are Included; however, Adding in Passive Values and Considering Qualitative Benefits Result in Economic Benefits that Far Exceed Costs

Key Findings (cont'd)

- Alone or Combined with Other Projects, a Flood Storage Facility Provides Positive Net Benefits Under the State and Basin Perspectives
- Under the Federal Perspective, a Flood Retention Only Facility has a Positive Net Benefit With and Without Flood Proofing

Key Findings (cont'd)

- The Biggest Driver of Benefits Comes from Reducing Damage to Structures, Content and Inventory
- No Option Will Mitigate All Flooding Damages from the Basin
- Including Climate Change Increase Benefits for Most Project Alternatives

Questions
