To: Chehalis River Basin Flood Authority

RE: Statement of interest and experience for Chehalis Basin Board

Thank you for the opportunity to be considered for a four-year term on the Chehalis Basin Board. I support the vision of both restoration and flood control within the Chehalis Basin that impacts our citizens and tribal partners. I have invested most of my 30-year career as a professional biologist in the basin to bring a balance to flood improvements and habitat restoration. As a fish biologist and elected Commissioner, I believe my experience and expertise will be a unique asset to the Chehalis Basin Board.

Experience:

Lewis County Commissioner, District 3.	November 2022 - Present
Supervisor, Chair: Chehalis River Basin Flood Control Zone District.	January 2023 – Present
Vice Chair, Lower Columbia Fish Recovery Board.	January 2023 – Present
Area Habitat Biologist. Washington Dept. Fish & Wildlife.	April 2001 – December 2021
Lead Biologist. Thurston Conservation District.	April 1996 – April 2001
Restoration Biologist. Lewis County Conservation District.	July 1994 – April 1996

I look forward to answering further questions or elaborating on my experience with the Chehalis River Basin Flood Authority during the selection process.

## Statement of Commitment:

I, Scott Brummer, commit to regularly attend Chehalis Basin Board Meetings and the Chehalis Basin Flood Authority meetings for the duration of this appointment.

Thank you,

Scott Brummer  
Lewis County Commissioner, District 3
